PROFESSIONAL SUMMARY

MCA graduate with strong expertise in full-stack web development using React.js, Node.js, Express.js, and MongoDB. Experienced in building scalable web applications, RESTful APIs, authentication systems, and real-time communication platforms. Skilled in JavaScript, cloud deployment, and backend architecture with hands-on project experience deployed via Vercel, Render, and Netlify. Seeking an entry-level Software Developer or Full Stack Developer role.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, HTML5, CSS3

Frontend: React.js, Bootstrap, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, Authentication & Authorization (JWT, OAuth)

Database: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, Socket.io, Multer, Cloudinary

Cloud & Deployment: Google Cloud Platform (GCP), Amazon Web Services (AWS), Vercel, Render, Netlify

Concepts: CRUD Operations, API Integration, Real-Time Communication, MVC Architecture, Error Handling, Asynchronous Programming

PROJECTS

DevConnect – Developer Social Platform | *React.js · Node.js · Express.js · MongoDB · JWT*

A full-stack developer networking platform enabling users to connect, share posts, and interact with other developers.

- Built scalable full-stack social networking platform using React.js, Node.js, Express.js, and MongoDB.
- Implemented JWT-based authentication, user profile management, and protected routes.
- Developed features including posts, likes, comments, and follow/unfollow system.
- Designed RESTful APIs and optimized backend architecture for scalability.
- Integrated responsive UI components for enhanced user experience.
- Deployed frontend and backend using modern cloud platforms (Vercel, Render).

Real-Time Chat Application | *Node.js · Socket.io · MongoDB · Express.js*

A real-time messaging application that enables instant communication using WebSockets.

- Developed real-time chat application using Socket.io and Node.js for instant communication.
- Implemented one-to-one messaging, online user status, and live typing indicators.
- Designed scalable backend architecture optimized for low-latency real-time data flow.
- Managed asynchronous event handling and efficient WebSocket connection management.
- Deployed application for live access and end-to-end testing.

Task Management Application | *React.js · Node.js · Express.js · MongoDB · JWT*

A full-stack task management system that allows users to organize and track tasks efficiently.

- Built full-stack task management system using React.js, Node.js, Express.js, and MongoDB.
- Implemented CRUD functionality with JWT authentication and protected API routes.
- Designed REST APIs with proper input validation and structured error handling.
- Developed responsive user interface for efficient task organization and tracking.
- Deployed web application using cloud hosting platforms for public accessibility.

EDUCATION

Master of Computer Applications (MCA)

2023 – 2025

Sona Devi University

Bachelor of Commerce (B.Com)

2016 – 2020

Yogoda Satsanga Mahavidyalaya, Ranchi University
